TEACHING EXPERIENCE

Florida State University, Professor, 2016 – present; Associate Professor of Composition, 2008 – 2016; Assistant Professor, 2002 – 2008.

Graduate and undergraduate composition lessons.

Eighteenth-century counterpoint 1: Introduction to the principles of tonal counterpoint through a modified species approach, and analysis and composition of choral preludes and two-voice inventions.

Eighteenth-century counterpoint 2: Continuation of tonal counterpoint, focusing on the analysis and composition of three- and four-voice fugues.

Orchestration: Introduction to Instrumentation and Orchestration with an emphasis on in-class performances of transcription projects.

Advanced orchestration: Review of extended instrumental techniques followed by extensive orchestral style study accompanied by in-class performances of transcription projects.

Fugue: Graduate course focusing on the composition and analysis of fugues by Bach and other composers.

Music Programming: Programming of multimedia works and software using Max/MSP.

Doctoral seminars on the music of György Ligeti and Computational Methods in Music Research.

Northern Illinois University, Assistant Professor of Music Theory and Composition, 2000 – 2002.

Music 101: First-year music theory for music majors. Topics covered include scales, key signatures, intervals, rhythm and meter, triads and seventh chords, diatonic triads, normative diatonic progressions, and partwriting.

Music 102: First-year music theory for music majors. Topics covered include first- and second-inversion diatonic triads, diatonic seventh chords, non harmonic tones, first-, second-, and fourth-species counterpoint, and basic formal analysis.

Music 201: Second-year music theory for music majors. Topics covered include secondary dominants and leading-tone chords, modulatory techniques, Neapolitan and augmented sixth chords, modal mixture, enharmonic modulations, and advanced chromatic techniques.

Music 202: Second-year formal analysis for music majors. Topics include basic formal components, binary and ternary forms, imitative polyphony and fugue, theme and variations, sonata, and rondo and sonata rondo.

Music 103, 104, 203, 204: First- and second-year aural skills for music majors. Skills developed include the ability to sing, play, identify, distinguish, and dictate a wide variety of musical materials: scales, intervals, rhythms, triads and seventh chords, diatonic and chromatic harmonic functions, melodies, and all of these components in context—i.e. combined within brief excerpts from music literature. This course uses the movable *do* solfège system.

Graduate and undergraduate composition lessons.

The University of Chicago

Lecturer, Music 251, Theory and Analysis I, 1999. Topics covered include Neapolitan and augmented-sixth chords, modal mixture, enharmonic modulations, model composition, analysis of binary and ternary forms, sonata form and variants, and an introduction to meter and hypermeter.

Lecturer, Music 252, Theory and Analysis II, 1998. Topics covered include modal mixture, enharmonic modulations, third-relations and cycles, analysis of nineteenth-century repertoire, and an introduction to twentieth-century analysis.

Graduate Assistant, graduate-level course in twentieth-century analysis which focused on pitch-class set theory, 1997.

Graduate Assistant, general musicianship, 1995 – 1996.

The Peabody Conservatory

Graduate Assistant in Electronic and Computer Music, including introduction to computer music and the psychology of sound and music, 1993 – 1994.

Graduate Assistant in Theory, including harmony, linear analysis, form and analysis, and graduate and undergraduate counterpoint, 1991 – 1993.
